Carroll Academy participates in an Accelerated Reader program for grades 1st-5th. The students in grades 2nd-5th take the STAR Test during August. The 1st grade takes the STAR Test in January. The STAR Test is a computer based reading assessment that uses computer-adaptive technology. Computer-adaptive means the test continually adjusts the difficulty of each child's test by choosing each test question based on the child's previous response. If the student answers a question correctly, the difficulty level of the next item is increased. If the child misses a question, the difficulty level is decreased.

After completing the STAR Test, the student receives a ZPD (Zone of Proximal Development) range. This range indicates the book level the student will read until the next STAR test. Students are tested in August, December, and April. Students must read books within their ZPD range.

The students take AR quizzes in the elementary library or the classroom. Students will be able to take quizzes until 3:15. The library is closed at 3:15. AR books can be checked out in the elementary library. Please remember to return books on time. The library book must be returned in order to take an AR test. The Carroll Academy library checks 1 book out at a time. When choosing books from home or the public library, please check online at arbookfind.com. This website will tell you if the book is an AR book and the reading level for the book. All books are not AR books.

Students in grades 2nd – 5th will receive a test grade for AR each nine weeks. This grade will be the average of all test scores taken each nine weeks.

Students in 1st grade will receive a reading daily grade for the week. The highest AR grade your child makes on an AR test during a week will be a reading daily grade for the week.
